**TREATISES**

<i>Manual For Complex Litigation, Fourth</i> (2004) .....	1
---	---

1        **I. INTRODUCTION**

2            This multidistrict litigation (“MDL”) proceeding includes cases brought by and on  
3        behalf of customers and subscribers of the largest telecommunications carriers in the United  
4        States, including the three primary long distance carriers, AT&T, MCI, and Sprint,<sup>1</sup> as well as  
5        “Baby Bells” Verizon and BellSouth, a number of wireless carriers, and their respective affiliates.  
6        In each case, Plaintiffs<sup>2</sup> allege that the defendant carriers, acting at the request of the National  
7        Security Agency (“NSA”), have unlawfully given the federal government access to: (1) the  
8        domestic and international telephone calls of their customers, including Plaintiffs (the “content”  
9        claims); and (2) records of the date, time, number dialed, and duration of those calls (the  
10      “records” claims).

11            In *Hepting v. AT&T Corp.*, 439 F. Supp. 2d 974 (N.D. Cal. 2006) (“*Hepting*”), the  
12      Court denied the government’s motion to dismiss or for summary judgment based on the state  
13      secrets privilege, and denied AT&T Corp.’s (“AT&T’s”) motion to dismiss based on lack of  
14      standing, failure to plead the absence of a certification, common law immunity, and qualified  
15      immunity. On November 22, 2006, the Court issued Pretrial Order No. 1, requiring, *inter alia*,  
16      “[a]ll parties to SHOW CAUSE in writing why the *Hepting* order should not apply to all cases  
17      and claims to which the government asserts the state secrets privilege” (the “OSC”).<sup>3</sup> Plaintiffs  
18      take issue with but one of the Court’s many rulings in *Hepting*: that “unlike the program  
19      monitoring communication content, the general contours and even the existence of the  
20      communication records program remain unclear.” *Id.* at 997.

21            

---

<sup>1</sup> In 2003, AT&T received 30.0% of all long distance toll service revenues, MCI received 20.8%,  
22      and Sprint, 8.2%; AT&T had residential long distance market share of 31.7%, MCI 13.0%, and  
23      Sprint 7.1%. Federal Communications Commission, Industry Analysis and Technology Division,  
24      Wireline Competition Bureau, *Trends in Telephone Service* (June 21, 2005), Tables 9.6, 9.7  
(available at [http://www.fcc.gov/Bureaus/Common\\_Carrier/Reports/FCC-State\\_Link/IAD/trend605.pdf](http://www.fcc.gov/Bureaus/Common_Carrier/Reports/FCC-State_Link/IAD/trend605.pdf)).

25            <sup>2</sup> Unless otherwise noted, “Plaintiffs” and “Defendants” refer to the named plaintiffs and  
26      defendants in the coordinated actions generally.

27            <sup>3</sup> The OSC is well within the statutory mandate of an MDL transferee judge to “promote the just  
28      and efficient conduct” of coordinated actions. 28 U.S.C. § 1407(a). Indeed, the “Bible” on MDL  
proceedings, the Federal Judicial Center’s *Manual for Complex Litigation, Fourth* (2004),  
expressly directs that “[o]rdinarily, it is advisable to order that . . . rulings on common issues—for  
example, on the statute of limitations—shall be deemed to have been made in the tag-along  
action[s] without the need for separate motions and orders . . .” *Id.* at § 20.132, p. 222-23.

1 The existence and general contours of the records program have been  
2 acknowledged by numerous members of the Congressional intelligence oversight committees  
3 briefed on the program by the NSA, and at least one carrier, Verizon, has tacitly admitted the  
4 participation of its newly-acquired subsidiary, MCI, in the records program. Accordingly, the  
5 records program is no longer a secret, and Plaintiffs should be permitted discovery on their  
6 records claims.

## 7 || II. THE MASTER COMPLAINTS

8 Pursuant to Pretrial Order No. 1 (Dkt. No. 79), Plaintiffs' List of Interim Class  
9 Counsel for Each Defendant Category (Dkt. No. 88), and the Court's Order Resetting Deadlines  
10 (Dkt. No. 112), on January 16, 2007, Plaintiffs filed five master complaints (collectively, the  
11 "Master Complaints") against the various defendant groups as follows: (1) Master Consolidated  
12 Complaint Against MCI Defendants<sup>4</sup> and Verizon Defendants<sup>5</sup> (Dkt. No. 125, "MCI/Verizon  
13 Master Compl."); (2) Master Consolidated Complaint Against Defendants Sprint Nextel  
14 Corporation, Sprint Communications Co. Ltd. Partnership, Nextel Communications, Inc., Embarq  
15 Corporation, UCOM, Inc., U.S. Telecom, Inc., Utelcom, Inc., and Does 1-100 for Damages,  
16 Declaratory and Equitable Relief (Dkt. No. 124, "Sprint Master Compl."); (3) Master  
17 Consolidated Complaint Against Defendant "BellSouth"<sup>6</sup> for Damages, Declaratory and  
18 Equitable Relief (Dkt. No. 126, "BellSouth Master Compl."); (4) Master Consolidated Complaint  
19 Against Defendants Transworld Network Corp., Comcast Telecommunications, Inc., T-Mobile  
20 USA, Inc., and McLeodUSA Telecommunications Services, Inc., for Damages, Declaratory and  
21 Equitable Relief (Dkt. No. 125, "Transworld Master Compl."); and (5) Master Consolidated

<sup>4</sup> Defendants MCI Communications Services, Inc. and MCI, LLC.

23       <sup>5</sup> Defendants Verizon Communications, Inc., Verizon California, Inc., Verizon Delaware, Inc.,  
24       Verizon Florida, Inc., Verizon Maryland Inc., Verizon New England, Inc., Verizon New Jersey,  
25       Inc., Verizon New York, Inc., Verizon North, Inc., Verizon Northwest, Inc., Verizon  
26       Pennsylvania, Inc., Verizon South, Inc., Verizon Virginia, Inc., Verizon Washington, D.C., Inc.,  
27       Verizon West Virginia, Inc., GTE Corporation, GTE Southwest Incorporates, Contel of the  
South, Inc., Verizon Federal, Inc., Bell Atlantic Communications, Inc., Verizon Select Services,  
Inc., NYNEX Long Distance Company, Verizon Business Network Services, Inc., Cellco  
Partnership, NYNEX Corporation, GTE Wireless, Inc., GTE Wireless of the South, Inc., NYNEX  
PCS, Inc., and Verizon Wireless of the East LP.

<sup>6</sup> Defendants BellSouth, BellSouth Communications, LLC, BellSouth Corp., BellSouth Corporation, BellSouth Telecommunications, Inc., and AT&T Southeast.

1 Complaint Against Defendants AT&T Mobility LLC (f/k/a Cingular Wireless, L.L.C.), Cingular  
2 Wireless Corp., and New Cingular Wireless Services, Inc. for Damages, Declaratory and  
3 Equitable Relief (Dkt. No. 121, "Cingular Master Compl.").<sup>7</sup>

4 The facts and claims alleged, and their substantial overlap with the facts and  
5 claims alleged in *Hepting*, are summarized below.

6 **A. The Common, Federal Claims**

7 Like the *Hepting* complaint, the Master Complaints assert federal constitutional  
8 and statutory claims for violations of:

9 (1) The First and Fourth Amendments to the United States  
10 Constitution (acting as agents or instruments of the government) by  
11 illegally intercepting, disclosing, divulging and/or using plaintiffs'  
communications;<sup>8</sup>

12 (2) Section 109 of Title I of the Foreign Intelligence Surveillance  
13 Act of 1978 (FISA), 50 U.S.C. § 1809, by engaging in illegal  
14 electronic surveillance of plaintiffs' communications under color of  
15 law;<sup>9</sup>

16 (3) Section 802 of Title III of the Omnibus Crime Control and Safe  
17 Streets Act of 1968, as amended by section 101 of Title I of the  
18 Electronic Communications Privacy Act of 1986 (ECPA), 18  
19 U.S.C. §§ 2511(1)(a), (1)(c), (1)(d) and (3)(a), by illegally  
intercepting, disclosing, using and/or divulging plaintiffs'  
communications;<sup>10</sup>

20 (4) Section 705 of Title VII of the Communications Act of 1934, as  
21 amended, 47 U.S.C. § 605, by unauthorized divulgence and/or  
22 publication of plaintiffs' communications;<sup>11</sup>

23 (5) Section 201 of Title II of the ECPA ("Stored Communications  
24 Act"), as amended, 18 U.S.C. §§ 2702(a)(1) and (a)(2), by illegally  
25 divulging the contents of plaintiffs' communications;<sup>12</sup>

26 (6) Section 201 of the Stored Communications Act, as amended by  
27 section 212 of Title II of the USA PATRIOT Act, 18 U.S.C.  
28 § 2702(a)(3), by illegally divulging records concerning plaintiffs'

---

<sup>7</sup> The operative complaint in *Hepting* (*Hepting* Dkt. No. 8) has been designated the lead  
complaint for the AT&T defendant group. *See* Transcript, Nov. 17, 2006 Case Management  
Conference, at 79:6-17.

<sup>8</sup> *See* Sixth Claim for Relief in each of the Master Complaints.

<sup>9</sup> *See* Fifth Claim for Relief in each of the Master Complaints.

<sup>10</sup> *See* Third Claim for Relief in each of the Master Complaints.

<sup>11</sup> *See* Fourth Claim for Relief in each of the Master Complaints.

<sup>12</sup> *See* First Claim for Relief in each of the Master Complaints.

1 communications to a governmental entity[;]<sup>13</sup> and

2 (7) California's Unfair Competition Law, Cal Bus & Prof Code  
3 §§ 17200 et seq., by engaging in unfair, unlawful and deceptive  
business practices.<sup>14</sup>

4 439 F. Supp. 2d at 978-79 (listing claims asserted in *Hepting*).

5 **B. The State Law Claims**

6 In addition to the claims asserted in *Hepting*, the Master Complaints assert several  
7 claims for relief arising under state law, specifically: (1) violation of the surveillance statutes of  
8 all States and the District of Columbia;<sup>15</sup> (2) violation of the consumer protection statutes of all  
9 States and the District of Columbia, based, *inter alia*, on Defendants' violation of their own

---

10 <sup>13</sup> See Second Claim for Relief in each of the Master Complaints.

11 <sup>14</sup> See Tenth Claim for Relief, MCI/Verizon Master Compl.; Ninth Claim for Relief, BellSouth  
12 Master Compl.; Ninth Claim for Relief, Transworld Master Compl.; Twenty-Third Claim for  
13 Relief, ¶ 265(e), Cingular Master Compl. This claim alleges, *inter alia*, that Defendants engaged  
14 in unlawful business practices by violating the Pen Register Act, 18 U.S.C. § 3121, *et seq.*, as  
15 well as 47 U.S.C. § 222(c), which requires Defendants to maintain the confidentiality of customer  
16 proprietary network information. While neither of these federal statutes provide for a private  
17 right of action, it is well-settled that violations of such federal statutes remain actionable as  
18 "unlawful business practices" in violation of California's Unfair Competition Law. See *Diaz v.  
19 Allstate Ins. Group*, 185 F.R.D. 581, 594 (C.D. Cal. 1998) ("Under California law, a private  
20 plaintiff may bring action under unfair competition statute to redress any unlawful business  
21 practice, including those that do not otherwise permit a private right of action") (citation omitted);  
22 *Ballard v. Equifax Check Services, Inc.*, 158 F. Supp. 2d 1163, 1176 (E.D. Cal. 2001) (violation  
23 of virtually any federal law may constitute unlawful business practice actionable under Cal.  
24 Unfair Competition Law).

<sup>17</sup> See Ninth Claim for Relief, MCI/Verizon Master Compl.; Fourteenth Claim for Relief, BellSouth Master Compl.; Ninth Claim for Relief, Sprint Master Compl.; Tenth Claim for Relief, Transworld Master Compl.; Twenty-Fourth Claim for Relief, Cingular Master Compl.

<sup>18</sup> See Fifteenth Claim for Relief, BellSouth Master Compl.; Tenth Claim for Relief, Sprint Master Compl.; Twenty-Fifth Claim for Relief, Cingular Master Compl.

<sup>19</sup> See BellSouth Master Compl., Eighth Claim for Relief.

<sup>20</sup> See *id.*, Tenth Claim for Relief.

<sup>21</sup> See Cingular Master Compl., Tenth Claim for Relief.

<sup>22</sup> See *id.*, Thirteenth Claim for Relief.

<sup>23</sup> See *id.*, Fourteenth Claim for Relief.

<sup>24</sup> See *id.*, Fifteenth Claim for Relief.

<sup>25</sup> See *id.*, Seventeenth Claim for Relief.

<sup>26</sup> See *id.*, Eighteenth and Nineteenth Claims for Relief.

1 under Texas law.<sup>27</sup> The *Campbell*<sup>28</sup> and *Riordan*<sup>29</sup> cases, which the Court has declined to  
2 remand, assert only non-class claims for declaratory and injunctive relief under the California  
3 Constitution and California Public Utilities Code Section 2891 against several AT&T defendants  
4 and a Verizon defendant, respectively. These non-class claims are proceeding in parallel with the  
5 Master Complaints.

6                   While litigation of these state law claims, and the defenses thereto, will no doubt  
7 be controlled or impacted by the Court's rulings in *Hepting*, these claims have not yet been  
8 asserted in *Hepting*<sup>30</sup> or addressed by the Court. Because the Court's rulings on the state secrets  
9 issues should apply equally to Plaintiffs' state and federal claims, Plaintiffs respectfully suggest  
10 that the Court's rulings on the state secrets issues in connection with the OSC apply to Plaintiffs'  
11 state law claims as well.

12                   However, Plaintiffs believe that litigation of the legal elements and defenses of  
13 their state law claims should be deferred for the time being, as (1) the declaratory relief,  
14 injunctive relief, and statutory damages available on Class Plaintiffs' federal statutory and  
15 constitutional claims may provide sufficient redress for their injuries; (2) the scope of discovery  
16 on the federal and state law claims appears to be the same; and (3) litigation of the elements and  
17 defenses particular to state law claims at this time might bog the case down in a complex and  
18 unnecessary battle over federal preemption and the elements of over 100 state statutes and the  
19 defenses thereto. To avoid premature and/or unnecessary litigation over these issues, Plaintiffs  
20 respectfully suggest that Defendants not be required to plead in response to Plaintiffs' state law  
21 claims, pending further order of the Court.<sup>31</sup>

22

---

23                   <sup>27</sup> See *id.*, Twenty-First Claim for Relief.

24                   <sup>28</sup> *Campbell v. AT&T Communications of California*, C-06-3596 VRW.

25                   <sup>29</sup> *Riordan v. Verizon Communications, Inc.*, C-06-3574 VRW.

26                   <sup>30</sup> As noted above, *Hepting* has been determined to be the lead case against the AT&T  
27 Defendants. AT&T Interim Class Counsel anticipate either amending or consolidating the  
multiple cases against AT&T when the *Hepting* appeal is complete, and will likely add some or  
all of the state law claims raised in the Master Complaints at that time.

28                   <sup>31</sup> Plaintiffs cannot anticipate all of the circumstances which might make it appropriate for  
litigation of their state law claims to move forward, and so would oppose a stay pending  
resolution of their federal claims.

1           **III. THE FACTUAL RECORD**

2           The government has repeatedly acknowledged the similarity of the factual  
3 allegations made in *Hepting* and the instant cases. *See, e.g.*, Joint Case Management Conference  
4 Statement (“Joint CMC Stmt.,” Dkt. No. 61-1) at 7:14-16 (“The transferred cases raise allegations  
5 similar to those raised in *Hepting* and *Terkel* concerning the interception of communications and  
6 the production of call record information”). Much of the material relied on by the Court in  
7 *Hepting* concerned plaintiffs’ content claims. That information, and the conclusions drawn from  
8 it by the Court, are equally applicable here. The Court also had before it certain information  
9 concerning the call records program. But the Master Complaints, and additional information  
10 from members of Congress of which the Court may take judicial notice, go considerably further.  
11 This additional information, including on the record statements by three members of the Senate  
12 Select Committee on Intelligence who had been briefed on the call records program by the  
13 Executive branch, unequivocally confirm the existence of the call records program, and two of its  
14 participants — AT&T and MCI. The relevant factual material is summarized below.

15           **A. Publicly Disclosed Information About the NSA Surveillance Program That**  
16           **Was Before The Court in *Hepting***

17           In *Hepting*, the Court catalogued the information that had been made public about  
18 “at least two different types of alleged NSA surveillance programs” (439 F. Supp. 2d at 986), all  
19 of which is included in the Master Complaints:<sup>32</sup>

20           • The confirmation by both the President and the Attorney General of the  
21           existence of the “terrorist surveillance program” first reported by the New  
22           York Times on December 16, 2005, the scope of the program, and the  
23           mechanism by which the program is authorized and reviewed.<sup>33</sup>

24           • The May 11, 2006 revelations by *USA Today* that BellSouth Corp.,  
25           Verizon Communications, Inc and AT&T were providing telephone  
26           calling records of tens of millions of Americans to the NSA, which the  
27           NSA uses “to analyze calling patterns in an effort to detect terrorist

---

28           <sup>32</sup> *See* MCI/Verizon Master Compl., ¶¶ 138-41, 149-51, 153; BellSouth Master Compl., ¶¶ 38-41,  
29           50-52, 55; Sprint Master Compl., ¶¶ 18-21, 30-32, 35; Transworld Master Compl., ¶¶ 21-24, 32-  
30           34, 36; Cingular Master Compl., ¶¶ 26-29, 38-40, 43. Out of an abundance of caution, Plaintiffs  
31           are submitting copies of the documents from which these allegations were drawn as exhibits to  
32           the Declaration of Barry Himmelstein and Request for Judicial Notice in Support of Class  
33           Plaintiffs’ Response to Order to Show Cause Why Rulings on *Hepting* Motions to Dismiss  
34           Should Not Apply (“Himmelstein Decl.”).

35           <sup>33</sup> *Hepting*, 439 F. Supp. 2d at 986-87. *See also* Himmelstein Decl., Exhs. A, B, and C.

1 activity.”<sup>34</sup>

2

3

4

- The release of a statement by the Attorney for Qwest Communications’ former CEO, Joseph Nacchio, which detailed how he had been asked to participate in the call records program (thereby confirming its existence), but declined to do so because of the government’s unwillingness to provide Qwest with legal process:

5 In the Fall of 2001 \* \* \* while Mr. Nacchio was  
6 Chairman and CEO of Qwest and was serving  
7 pursuant to the President’s appointment as the  
8 Chairman of the National Security  
Telecommunications Advisory Committee, Qwest  
was approached to permit the Government access to  
the private telephone records of Qwest customers.

9 Mr. Nacchio made inquiry as to whether a warrant or  
10 other legal process had been secured in support of  
11 that request. When he learned that no such  
12 authority had been granted and that there was a  
13 disinclination on the part of the authorities to use  
14 any legal process, including the Special Court which  
15 had been established to handle such matters, Mr. Nacchio concluded that these requests violated the privacy requirements of the Telecommunications [sic] Act. Accordingly, Mr. Nacchio issued instructions to refuse to comply with these requests. These requests continued throughout Mr. Nacchio’s tenure and until his departure in June of 2002.<sup>35</sup>

16

17

- The public statements made by defendants BellSouth and Verizon denying their involvement in the call records program.<sup>36</sup> The BellSouth statement read in relevant part:

18 As a result of media reports that BellSouth provided massive  
19 amounts of customer calling information under a contract with the  
20 NSA, the Company conducted an internal review to determine the  
21 facts. Based on our review to date, we have confirmed no such  
22 contract exists and we have not provided bulk customer calling  
23 records to the NSA.<sup>37</sup>

24 Verizon stated, in relevant part:

25 One of the most glaring and repeated falsehoods in the media reporting is the assertion that, in the aftermath of the 9/11 attacks, Verizon was approached by NSA and entered into an arrangement to provide the NSA with data from its customers’ domestic calls.

26 This is false. From the time of the 9/11 attacks *until just four*

---

27<sup>34</sup> *Id.* at 988. *See also* Himmelstein Decl., Exh. K at 1.

28<sup>35</sup> *Id.* *See also* Himmelstein Decl., Exh. N.

<sup>36</sup> *Id.* at 988.

<sup>37</sup> *Id.* *See also* Himmelstein Decl., Exh. Q.

months ago, Verizon had three major businesses-its wireline phone business, its wireless company and its directory publishing business. It also had its own Internet Service Provider and long-distance businesses. Contrary to the media reports, Verizon was not asked by NSA to provide, nor did Verizon provide, customer phone records from any of *these businesses*, or any call data from *those records*. None of *these companies*-wireless or wireline-provided customer records or call data.<sup>38</sup>

- Although not quoted by the Court in *Hepting*, Verizon's statement went on to say:

Verizon cannot and will not confirm or deny whether it has any relationship to the classified NSA program. Verizon always stands ready, however, to help protect the country from terrorist attack. We owe this duty to our fellow citizens. We also have a duty, that we have always fulfilled, to protect the privacy of our customers. The two are not in conflict. When asked for help, we will always make sure that any assistance is authorized by law and that our customers' privacy is safeguarded.<sup>39</sup>

- Unlike defendants BellSouth and Verizon, neither AT&T nor the government has confirmed or denied the existence of a program of providing telephone calling records to the NSA.<sup>40</sup>

**B. Statements By Members of Congress Who Have Been Briefed on the Call Records Program**

While the Court in *Hepting* concluded that it did not have enough publicly available information either from the government or the carriers to permit discovery to go forward on the call records program, additional, authoritative information further confirming the existence of the call records program is now available. First, members of Congress who have been briefed extensively about the surveillance programs by the Administration have confirmed its existence. Among them are at least three members of the Senate Select Committee on Intelligence, all of whom have gone on the record confirming the existence of the records program.

Shortly after the May 11, 2006 *USA Today* report on the records program, the Chairman of the Senate Intelligence Committee, Kansas Senator Pat Roberts, was specifically

<sup>38</sup> *Id.* at 988-89 (emphasis added).

<sup>39</sup> News Release, *Verizon Issues Statement on NSA Media Coverage* (May 16, 2006), available at <http://newscenter.verizon.com/proactive/newsroom/release.vtml?id=93450> (Himmelstein Decl., Exh. R). Verizon's statement bears striking resemblance to several AT&T statements relied upon by the Court in *Hepting*, 429 F. Supp. 2d at 992, indicating that, when asked, Verizon will provide assistance to the government if it believes the request to be lawful.

<sup>40</sup> *Hepting*, 439 F. Supp. 2d at 989.

1 asked about that program on the National Public Radio news program, "All Things Considered."  
2 In discussing the program, Senator Roberts explained how he and members of his Committee had  
3 detailed knowledge of the program:

4 [Melissa] BLOCK: Let me clarify, because it seems we're talking  
5 about two different programs. One of which does involve  
6 monitoring. It involves domestic calls to numbers overseas back  
7 and forth. The other has to do with the collection of phone records,  
8 which did not involve monitoring.

9 Regardless, I wanted to ask you about a comment from your  
10 colleague Republican Senator Arlen Specter, who made the point  
11 over the weekend that there has been no meaningful Congressional  
12 oversight of these programs. Do you agree?

13 Senator ROBERTS: No, I don't. Arlen has not been read into the  
14 operational details of the program. I have ever since the inception  
15 of the program, along with Senator Rockefeller and along with our  
16 two counterparts in the House and along with the leadership. If you  
17 attend these briefings, and there have been many of them, and you  
ask tough questions and you get the answers that you want back, or  
if you don't, you go back and you ask another question and you  
make sure of it, I don't know what part of oversight that is not.

18 Basically, that was expanded so that we had a seven member  
19 subcommittee. We've had, what, three or four hearings, numerous  
20 briefings. We've actually gone out and seen the program at work.  
21 We visited with the people who run it. I don't know of any  
22 program that is more scrutinized than this one, so we have had  
23 oversight. Senator Specter has not been read into the operational  
24 details and so I think that is his concern.

25 BLOCK: You're saying that you are read into it. *I'm curious then*  
26 *if you're saying that you have had oversight directly of the program*  
27 *as has been reported, under which the NSA has collected millions*  
28 *of phone records of domestic calls.*

29 Senator ROBERTS: Well, basically, *if you want to get into that,*  
30 *we're talking about business records.* We're not, you know, we're  
31 not listening to anybody. This isn't a situation where if I call you,  
32 you call me, or if I call home or whatever, that that conversation is  
33 being listened to.

34 BLOCK: But those records are being kept and turned over to the  
35 government?

36 Senator ROBERTS: I really can't comment on the details of the  
37 program. I can just tell you that basically what we have is a very  
38 highly minimized military capability to detect and deter and stop  
39 terrorist attacks and that's precisely what it does.<sup>41</sup>

40  
41 *Senate Intelligence Chair Readies For Hayden Hearings*, NPR All Things Considered, May 17,  
42 2006 (Himmelstein Decl., Exh. T at 2) (emphasis added).

On May 16, 2006, CBS News reported that Senator “Roberts tells [CBS News correspondent Gloria] Borger that the NSA was looking at the phone calls collected during the surveillance, but he said not at the content, just at the pattern of phone calls.”<sup>42</sup>

Similarly, the same day that *USA Today* ran its initial story about the call records program, Senator Kit Bond, another member of the same subcommittee of the Senate Intelligence Committee, also confirmed that he had been briefed on the existence of the call records program, this time on PBS' *The News Hour with Jim Lehrer*:

JIM LEHRER: Senator Bond, how do you respond to that – you're a member – first of all, let me ask you directly. You're a member of the Senate Intelligence Committee. Did you know about this?

SEN. KIT BOND, R-Mo.: Yes. I'm a member of the subcommittee of the Intelligence Committee that's been thoroughly briefed on this program and other programs.

\* \* \*

Now, to move on to the points, number one, my colleague, Senator Leahy, is a good lawyer, and I believe that he knows, as any lawyer should know, that business records are not protected by the Fourth Amendment.

The case of *Smith v. Maryland* in 1979, the U.S. Supreme Court said that the government could continue to use phone records, who called from where to where, at what time, for what length, for intelligence and criminal investigations without a warrant.

This has been going on, and this has been gone on long before the president's program started. . . .

JIM LEHRER: Excuse me, Senator Leahy, and let me just ask just one follow-up question to Senator Bond so we understand what this is about.

What these are, are records. And nobody then -- now, these are -- but there are tens of millions of records that are in this database, right? And they say somebody, Billy Bob called Sammy Sue or whatever, and that's all it says, and then they go and try to match them with other people?

SEN. KIT BOND: First, let me say that I'm not commenting on in any way any of the allegations made in the news story today. *I can tell you about the president's program.*

*The president's program uses information collected from phone companies. The phone companies keep their records. They have a*

<sup>42</sup> *Congress To Be Briefed On NSA*, CBS News, May 16, 2006 (Himmelstein Decl., Exh. W), p. 1.

1 record. And it shows what telephone number called what other  
2 telephone number.<sup>43</sup>

3 Former Senate Majority Leader William Frist, who, as part of the Senate  
4 leadership and as an *ex officio* member of the Senate Intelligence Committee, was briefed on the  
5 call records program, also confirmed the existence of the program to CNN's Wolf Blitzer:

6 BLITZER: Let's talk about the surveillance program here in the  
7 United States since 9/11. USA Today reported a bombshell this  
8 week. Let me read to you from the article on Thursday.

9 "The National Security Agency has been secretly collecting the  
10 phone call records of tens of millions of Americans using data  
11 provided by AT&T, Verizon and BellSouth. The NSA program  
reaches into homes and businesses across the nation by amassing  
information about the calls of ordinary Americans, most of whom  
aren't suspected of any crime. With access to records of billions of  
domestic calls, the NSA has gained a secret window into the  
communications habits of millions of Americans."

12 *Are you comfortable with this program?*

13 FRIST: *Absolutely. Absolutely. I am one of the people who are*  
14 *briefed...*

15 BLITZER: You've known about this for years.

16 FRIST: *I've known about the program. I am absolutely convinced*  
17 *that you, your family, our families are safer because of this*  
18 *particular program.*

19 The substance of each of these interviews is alleged in each of the Master Complaints.<sup>45</sup>

20 In a May 16, 2006 White House Press Briefing, in response to a question whether  
21 the records program "has been fully briefed to members in the United States Congress," White  
22 House Press Secretary Tony Snow responded that "all intelligence matters conducted by the  
23 National Security Agency — and we've said this many times — have been fully briefed to a  
24 handful of members of the Senate Intelligence and House Intelligence Committees and to the

25 <sup>43</sup> PBS Online NewsHour, *NSA Wire Tapping Program Revealed*, May 11, 2006 (Himmelstein  
26 Decl., Exh. L at 4-5) (emphasis added).

27 <sup>44</sup> CNN Late Edition with Wolf Blitzer, May 14, 2006 (Himmelstein Decl., Exh. P at 13)  
(emphasis added).

28 <sup>45</sup> See MCI/Verizon Master Compl., ¶¶ 154-56; BellSouth Master Compl., ¶¶ 56-58; Sprint

46.

1 leadership.”<sup>46</sup>

2                   In a May 17, 2006 letter to then Speaker of the House of Representatives the Hon.  
3 Dennis J. Hastert, the Director of National Intelligence, John D. Negroponte, provided a list “of  
4 the dates, locations, and names of members of Congress who attended briefings on the Terrorist  
5 Surveillance Program,” expressly stating that “this information can be made available in an  
6 unclassified format,” and that “[t]he briefings typically occurred at the White House prior to  
7 December 17, 2005. After December 17, the briefings occurred at the Capitol, NSA, or the White  
8 House.” Himmelstein Decl., Exh. Y. Consistent with Senator Roberts’ interview, the attached  
9 list confirms that the Senator was briefed on the program on ten such occasions over a period of  
10 more than three years. *See id.* (29-Jan-03, 17-Jul-03, 0-Mar-04, 3-Feb-05, 14-Sep-05, 11-Jan-06,  
11 20-Jan-06, 11-Feb-06, 9-Mar-06, 13-Mar-06). The same list confirms that Senator Bond was  
12 briefed on the program twice in March 2006, and that Senator Frist was briefed on the program in  
13 March 2004 and January 2006. *Id.* As noted by Senator Bond in his interview, Senator Spector’s  
14 name does not appear on the list. *Id.*

15                   The same day, at a White House Press Briefing, Mr. Snow explained that while  
16 such briefings had previously been limited, the full membership of the Intelligence Committees  
17 would be briefed on the “the entire scope of NSA surveillance,” and not merely the contents  
18 program that the President had publicly acknowledged:

19                   First: Who is doing the briefings in the National Security Agency?  
20 That is already out and about now, but it's General Keith  
Alexander; the NSA Director is doing the briefings on the Hill.

21                   \* \* \*

22                   Q Okay, but the briefing is the full Senate --

23                   MR. SNOW: The full Senate Intelligence Committee and the full  
24 House Intelligence Committee -- the full Senate [Intelligence  
Committee] today.

25                   Q This seems to be a bit of a departure from what we were  
26 previously led to believe. What's behind "the more, the merrier"?

27                   MR. SNOW: What's behind -- how about "the more, the better

---

28                   <sup>46</sup> *Press Briefing by Tony Snow, The White House, Office of the Press Secretary, May 16, 2006*  
(Himmelstein Decl., Exh. X) at 1.

1 informed"? As Senator Roberts said earlier today, he thought it was  
2 an uncomfortable situation in which you would have seven  
3 members fully briefed on the program as they're getting ready to do  
4 confirmation hearings, and eight members not briefed. There was a  
5 strong sense that everybody needed to be read into the program to  
6 do what they needed, in his opinion, to do to have a full and  
7 appropriate confirmation hearing for General Hayden. And we  
8 agreed with him.

9 \* \* \*

10 Q Can I go back to the NSA briefings that are going on May 17,  
11 2006? Is the briefing going to be limited to the program that the  
12 President has publicly acknowledged? Or is it going to be the entire  
13 scope of NSA surveillance? Will the people who are briefed get the  
14 full picture of what is going on?

15 MR. SNOW: Permit me to turn to my trustworthy assistants.

16 MS. PERINO: Full terrorist surveillance program.

17 MR. SNOW: Full terrorist surveillance program.

18 *Press Briefing by Tony Snow, The White House, Office of the Press Secretary, May 17, 2006*  
19 (Himmelstein Decl., Exh. Z), at 1-2, 8.

20 Following these briefings, on June 30, 2006, *USA Today* reported that:

21 Nineteen lawmakers who had been briefed on the program verified  
22 that the NSA has built a database that includes records of  
23 Americans' domestic phone calls. The program collected records of  
24 the numbers dialed and the length of calls, sources have said, but  
25 did not involve listening to the calls or recording their content.

26 • Five members of the intelligence committees said they were told  
27 by senior intelligence officials that AT&T participated in the NSA  
28 domestic calls program.

29 \* \* \*

30 • [Four lawmakers] said MCI, the long-distance carrier that Verizon  
31 acquired in January, did provide call records to the government.

32 Himmelstein Decl., Exh. V at 1-2. *See* BellSouth Master Compl., ¶ 60; Sprint Master Compl., ¶  
33 40; Transworld Master Compl., ¶ 40; Cingular Master Compl., ¶ 48.

34 **C. Additional Public Disclosures Not Discussed in *Hepting***

35 The Master Complaints contain further public disclosures regarding the existence  
36 and operation of the government's surveillance programs, including the call records program.  
37 These disclosures provide added detail about the programs:

1 On December 24, 2005, *The New York Times* reported in an article  
2 entitled, "Spy Agency Mined Vast Data Trove, Officials Report,"<sup>47</sup>  
that:

3 The National Security Agency has traced and analyzed large  
4 volumes of telephone and Internet communications flowing  
5 into and out of the United States as part of the  
6 eavesdropping program that President Bush approved after  
7 the Sept. 11, 2001 attacks to hunt for evidence of terrorist  
8 activity, according to current and former government  
9 officials. The volume of information harvested from  
10 telecommunication data and voice networks, without court-  
11 approved warrants, is much larger than the White House has  
12 acknowledged, the officials said. It was collected by  
13 tapping directly into some of the American  
14 telecommunication system's main arteries, they said.

15 The officials said that as part of the program, "the N.S.A.  
16 has gained the cooperation of American telecommunications  
17 companies to obtain backdoor access to streams of domestic  
18 and international communications," and that the program is  
19 a "large data-mining operation," in which N.S.A.  
20 technicians have combed through large volumes of phone  
21 and Internet traffic in search of patterns that might point to  
22 terrorism suspects. In addition, the article reports, "[s]everal  
23 officials said that after President Bush's order authorizing  
24 the N.S.A. program, senior government officials arranged  
25 with officials of some of the nation's largest  
26 telecommunications companies to gain access to switches  
27 that act as gateways at the borders between the United  
28 States' communication networks and international  
networks."

29 In a January 3, 2006 article entitled, "Tinker, Tailor, Miner, Spy"  
30 (available at  
31 <http://www.slate.com/toolbar.aspx?action=print&id=2133564>),<sup>48</sup>  
32 Slate.com reported:

33 The agency [the NSA] used to search the transmissions it  
34 monitors for key words, such as names and phone numbers,  
35 which are supplied by other intelligence agencies that want  
36 to track certain individuals. But now the NSA appears to be  
37 vacuuming up all data, generally without a particular phone  
38 line, name, or e-mail address as a target. Reportedly, the  
39 agency is analyzing the length of a call, the time it was  
40 placed, and the origin and destination of electronic  
41 transmissions.

42 In a January 17, 2006 article, "Spy Agency Data After Sept. 11 Led  
43 F.B.I. to Dead Ends,"<sup>49</sup> *The New York Times* stated that officials  
44 who were briefed on the N.S.A. program said that:

45  
46  
47 Himmelstein Decl., Exh. D at 1-2.

48 Himmelstein Decl., Exh. E at 2.

49 Himmelstein Decl., Exh. F at 2-3.

1 the agency collected much of the data passed on to the  
2 F.B.I. as tips by tracing phone numbers in the United States  
3 called by suspects overseas, and then by following the  
4 domestic numbers to other numbers called. In other cases,  
lists of phone numbers appeared to result from the agency's  
computerized scanning of communications coming into and  
going out of the country for names and keywords that might  
be of interest.

5 A January 20, 2006 article in the *National Journal*, "NSA Spy  
6 Program Hinges On State-of-the-Art Technology,"<sup>50</sup> reported that:

7 Officials with some of the nation's leading  
8 telecommunications companies have said they gave the  
9 NSA access to their switches, the hubs through which  
enormous volumes of phone and e-mail traffic pass every  
10 day, to aid the agency's effort to determine exactly whom  
suspected Qaeda figures were calling in the United States  
and abroad and who else was calling those numbers. The  
11 NSA used the intercepts to construct webs of potentially  
interrelated persons.

12 In a January 21, 2006 article in *Bloomberg News* entitled  
13 "Lawmaker Queries Microsoft, Other Companies on NSA  
14 Wiretaps,"<sup>51</sup> Daniel Berninger, a senior analyst at Tier 1 Research  
in Plymouth, Minnesota, said,

15 in the past, the NSA has gotten permission from phone  
16 companies to gain access to so-called switches, high-  
powered computers into which phone traffic flows and is  
17 redirected, at 600 locations across the nation. . . . From these  
corporate relationships, the NSA can get the content of calls  
and records on their date, time, length, origin and  
destination.

18 On February 5, 2006, an article appearing in the *Washington Post*  
19 entitled "Surveillance Net Yields Few Suspects"<sup>52</sup> stated that  
20 officials said "[s]urveillance takes place in several stages . . . the  
earliest by machine. Computer-controlled systems collect and sift  
21 basic information about hundreds of thousands of faxes, e-mails  
and telephone calls into and out of the United States before  
selecting the ones for scrutiny by human eyes and ears.  
22 Successive stages of filtering grow more intrusive as artificial  
intelligence systems rank voice and data traffic in order of likeliest  
23 interest to human analysts." The article continues, "[f]or years,  
including in public testimony by Hayden, the agency [the NSA] has  
24 acknowledged use of automated equipment to analyze the contents  
and guide analysts to the most important ones. According to one  
knowledgeable source, the warrantless program also uses those  
methods. That is significant . . . because this kind of filtering  
intrudes into content, and machines 'listen' to more Americans than

27 <sup>50</sup> Himmelstein Decl., Exh. G at 2.  
28 <sup>51</sup> Himmelstein Decl., Exh. H at 1.  
29 <sup>52</sup> Himmelstein Decl., Exh. I at 1, 5.

humans do.”

On February 6, 2006, in an article entitled “Telecoms let NSA spy on calls,”<sup>53</sup> the nationwide newspaper *USA Today* reported that “[t]he National Security Agency has secured the cooperation of large telecommunications companies, including AT&T, MCI and Sprint, in its efforts to eavesdrop without warrants on international calls by suspected terrorists, according to seven telecommunications executives.” The article acknowledged that *The New York Times* had previously reported that the telecommunications companies had been cooperating with the government but had not revealed the names of the companies involved. In addition, it stated that long-distance carriers AT&T, MCI, and Sprint “all own ‘gateway’ switches capable of routing calls to points around the globe,” and that “[t]elecommunications executives say MCI, AT&T, and Sprint grant the access to their systems without warrants or court orders. Instead, they are cooperating on the basis of oral requests from senior government officials.”

\* \* \*

On May 29, 2006, Seymour Hersh reported in *The New Yorker* in an article entitled “Listening In”<sup>54</sup> that a security consultant working with a major telecommunications carrier “told me that his client set up a top-secret high-speed circuit between its main computer complex and Quantico, Virginia, the site of a government-intelligence computer center. This link provided direct access to the carrier’s network core – the critical area of its system, where all its data are stored. ‘What the companies are doing is worse than turning over records,’ the consultant said. ‘They’re providing total access to all the data.’”

**IV. WITH ONE EXCEPTION, THE COURT'S RULINGS ON THE STATE SECRETS ISSUES IN *HEPTING* ARE EQUALLY APPLICABLE HERE**

In *Hepting*, the United States moved to intervene in order to assert the state secrets privilege, and moved for dismissal or summary judgment based on the privilege. While the government has not as yet intervened in any of the cases made part of this MDL proceeding other than *Hepting* and *Terkel*,<sup>55</sup> it has stated that if the other cases are not stayed, “the Government

<sup>53</sup> Himmelstein Decl., Exh. J at 1-2.

<sup>54</sup> Himmelstein Decl., Exh. U at 1.

<sup>55</sup> *Terkel v. AT&T Corp.*, 441 F. Supp. 2d 899 (N.D. Ill. 2006) (“*Terkel*”) (N.D. Ill. Case No. 06-C-2837).

1 expects to assert the state secrets privilege in all the cases currently transferred.” Joint CMC  
2 Stmt., at 26:15-16. To avoid unnecessary litigation over the propriety of intervention, Plaintiffs  
3 are willing to stipulate to intervention by the government in each of the cases for the limited  
4 purpose of asserting the state secrets privilege.

5 In *Hepting*, the Court agreed that “that the government has satisfied the three  
6 threshold requirements for properly asserting the state secrets privilege: (1) the head of the  
7 relevant department, Director of National Intelligence John D Negroponte (2) has lodged a formal  
8 claim of privilege (3) after personally considering the matter. Moreover, the Director of the NSA,  
9 Lieutenant General Keith B Alexander, has filed a declaration supporting Director Negroponte’s  
10 assertion of the privilege.” *Id.* at 993 (citations omitted). While the government may choose not  
11 to re-submit these declarations in response to the Court’s order to show cause, the unclassified  
12 versions of the declarations remain part of the record in this multidistrict litigation proceeding,  
13 and the government has expressly confirmed that “[t]his MDL proceeding presents the same state  
14 secrets privilege issues that previously have been raised by the United States in the *Hepting* and  
15 *Terkel* actions.” Joint CMC Stmt. at 15:10-12. Indeed, the government has *complained* that it  
16 would be a “burdensome undertaking” to require it to relitigate the state secrets issues (*id.* at  
17 22:19). As with intervention, Plaintiffs are willing to spare the government this effort, and will  
18 stipulate that both the public and non-public versions of the declarations submitted by the  
19 government in connection with the motions to dismiss in *Hepting* may be considered by the Court  
20 in ruling on its order to show cause.<sup>56</sup>

21 In *Hepting*, the government argued that the state secrets privilege required  
22 dismissal of the action or granting summary judgment for AT&T on numerous grounds, including  
23 that:

24 (1) the very subject matter of this case is a state secret; (2)  
25 plaintiffs cannot make a *prima facie* case for their claims without  
26 classified evidence and (3) the privilege effectively deprives AT&T  
of information necessary to raise valid defenses.

27 *Id.* at 985. The Court also considered whether the *Hepting* claims were barred by the categorical

28 <sup>56</sup> By so stipulating, Plaintiffs do not waive the right to seek to have the declarations or portions  
thereof unsealed.

1 *Totten/Tenet* bar. See *Totten v. United States*, 92 U.S. 105 (1876); *Tenet v. Doe*, 544 U.S. 1  
2 (2005). Each of these arguments is addressed separately below.<sup>57</sup>

3 **A. The Categorical *Totten/Tenet* Bar Does Not Apply**

4 As the Supreme Court recently observed, the “categorical *Totten* bar” is limited to  
5 “the distinct class of cases that depend upon clandestine spy relationships.” *Tenet*, 544 U.S. at 9.  
6 As this Court observed in *Hepting*, in distinguishing these cases:

7 *Totten* and *Tenet* are not on point to the extent they hold that former  
8 spies cannot enforce agreements with the government because the  
9 parties implicitly agreed that such suits would be barred. The  
10 implicit notion in *Totten* was one of equitable estoppel: one who  
11 agrees to conduct covert operations impliedly agrees not to reveal  
the agreement even if the agreement is breached. But AT&T, the  
alleged spy, is not the plaintiff here. In this case, plaintiffs made no  
agreement with the government and are not bound by any implied  
covenant of secrecy.

12 \* \* \*

13 The court’s conclusion here follows the path set in *Halkin v. Helms*  
14 and *Ellsberg v. Mitchell*, the two cases most factually similar to the  
present. The *Halkin* and *Ellsberg* courts did not preclude suit  
because of a *Totten*-based implied covenant of silence. . . . [T]he  
court sees no reason to apply the *Totten* bar here.

16 *Id.* at 991, 993. *Accord Terkel*, 441 F. Supp. 2d at 907 (distinguishing *Totten* and *Tenet* on same  
17 grounds).

18 The Court’s reasoning is equally applicable to Defendants. Plaintiffs, and the  
19 members of the classes they seek to represent, are the objects of the alleged espionage, not its  
20 agents. They “made no agreement with the government and are not bound by any implied  
21 covenant of secrecy.” 439 F. Supp. 2d at 991. On the contrary, Plaintiffs were assured by  
22 Defendants via their respective privacy policies that the confidentiality of Plaintiffs’  
23 communications and records would be maintained inviolate, except as required by law.<sup>58</sup> If

24 \_\_\_\_\_  
25 <sup>57</sup> As set forth above, Plaintiffs are willing to defer litigation on the elements of their state law  
claims. However, the Court’s rulings in *Hepting* on the state secrets issue and federal statutory  
privileges are equally applicable to Plaintiffs’ state law claims, which are based on common  
factual allegations. Accordingly, the Court’s rulings on these issues should apply to the state law  
claims asserted in the Master Complaints, *Campbell*, and *Riordan*.

26 <sup>58</sup> See MCI/Verizon Master Compl., ¶¶ 179-81, 268, 274; BellSouth Master Compl., ¶¶ 203, 208,  
213; Sprint Master Compl., ¶¶ 140, 144, 149; Transworld Master Compl., ¶¶ 174, 179; Cingular  
Master Compl., ¶¶ 211, 229-30, 237, 265, 269, 274.

1 Plaintiffs had any expectations arising out of their contractual relationships with their carriers, it  
2 was that their carriers would abide by these policies and obey the law, not engineer their  
3 wholesale violation. Accordingly, the categorical *Totten/Tenet* bar does not apply.

4 **B. The Very Subject Matter of the Actions is Not a State Secret**

5 As the Court noted, “no case dismissed because its ‘very subject matter’ was a  
6 state secret involved ongoing, widespread violations of individual constitutional rights, as  
7 plaintiffs allege here.” *Id.* at 993. Plaintiffs hasten to add that they are unaware of any case  
8 dismissed on state secret grounds which involved anything remotely approaching the widespread  
9 violations of federal privacy statutes alleged here, which define the permissible bounds of  
10 behavior for telecommunications carriers. By contrast, the Court noted that “most cases in which  
11 the ‘very subject matter’ was a state secret involved classified details about either a highly  
12 technical invention or a covert espionage relationship.” *Id.* (citations omitted). As in *Hepting*,  
13 these cases involve neither, and “focus[] only on whether [Defendants] intercepted and disclosed  
14 communications or communications records to the government.” *Id.* at 994. As the Court held in  
15 *Hepting*, given the “significant amounts of information about the government’s monitoring of  
16 communications content” already in the public record (*see* Part III.A., *supra*), “the very subject  
17 matter of this action is hardly a secret,” and the actions should not be dismissed on that ground.  
18 *Id.*<sup>59</sup>

19 **C. Dismissal on Evidentiary Grounds Would Be Premature**

20 In *Hepting*, the Court held that it would be “premature” to “decide at this time  
21 whether this case should be dismissed on the ground that the government’s state secrets assertion  
22 will preclude evidence necessary for plaintiffs to establish a *prima facie* case or for AT&T to  
23 raise a valid defense to the claims.” 439 F. Supp. 2d at 994. In so holding, the Court noted its  
24 subsequent finding that “Plaintiffs appear to be entitled to at least some discovery,” and followed  
25 the approach taken in other cases of “allow[ing] them to proceed to discovery sufficiently to  
26 assess the state secrets privilege in light of the facts.” *Id.* Just as “[t]he government has not

---

28 <sup>59</sup> *See also, Terkel*, 441 F. Supp. 2d at 908 (finding that “the very subject matter of this lawsuit is  
not necessarily a state secret”).

1 shown why that should not be the course of this litigation [*Hepting*]” (*id.*), there is no reason to  
2 depart from the Court’s holding here.

3 **D. The Existence or Non-Existence of a Certification Is Not a State Secret**

4 In *Hepting*, the government argued that “the issue whether AT&T received a  
5 certification authorizing its assistance to the government is a state secret.” *Id.* at 995. The Court  
6 held that, given that the government had admitted monitoring international-domestic  
7 communications where it suspects that one party to the communication is affiliated with al Qaeda:

8 revealing whether AT&T has received a certification to assist in  
9 monitoring communication content should not reveal any new  
information that would assist a terrorist and adversely affect  
national security. And if the government has not been truthful, the  
state secrets privilege should not serve as a shield for its false  
10 public statements.

11 *Id.* at 996. The disclosures found dispositive by the Court are not carrier-specific, and apply  
12 equally to all Defendants. Accordingly, the court’s conclusion “that the state secrets privilege  
13 will not prevent AT&T from asserting a certification-based defense, as appropriate, regarding  
14 allegations that it assisted the government in monitoring communication content,” is equally  
15 applicable here.<sup>60</sup>

16 Indeed, the government’s recent submission (Dkt. 127) stating that “any electronic  
17 surveillance that was occurring as part of the Terrorist Surveillance Program (TSP) will now be  
18 conducted subject to the approval of the Foreign Intelligence Surveillance Court,” eliminates any  
19 secrecy concerning the existence or non-existence of a certification, and makes it appropriate for  
20 the Court to proceed under 50 U.S.C. § 1806(f), which requires that the Court “shall,  
21 notwithstanding any other law, . . . review in camera and *ex parte* the application, order, and such  
22 other materials relating to the surveillance as may be necessary to determine whether the  
23 surveillance of the aggrieved person was lawfully authorized and conducted.”

24 **E. The Statutory Privileges Do Not Warrant Dismissal**

25 Finally, in *Hepting*, the government argued that dismissal was required by two  
26 “statutory privileges,” 50 U.S.C. § 402 *note*, §6, which protects “information with respect to the

27  
28 <sup>60</sup> The issue of whether the existence of the records program remains a genuine “secret” is  
addressed in Part V, *infra*.

1 activities” of the NSA, and 50 U.S.C. § 403-1(i)(1), which requires the Director of National  
2 Intelligence to “protect intelligence sources and methods from unauthorized disclosure.” *Id.* at  
3 998. The Court rejected this argument, because “[n]either of these provisions by their terms  
4 requires the court to dismiss this action and it would be premature for the court to do so at this  
5 time.” *Id.*<sup>61</sup> As the Court’s holding is based on its interpretation of these statutes, not on facts  
6 unique to AT&T, the Court’s holding is equally applicable here.

7 **V. ADDITIONAL INFORMATION CONFIRMS THAT THE RECORDS PROGRAM**  
8 **IS NOT A SECRET**

9 **A. The Court’s Ruling in *Hepting***

10 In determining whether the existence of the records program is a secret for  
11 purposes of the state secrets privilege, the Court noted that it “may rely upon reliable public  
12 evidence that might otherwise be inadmissible at trial because it does not comply with the  
13 technical requirements of the rules of evidence.” 439 F. Supp. 2d at 991 (citing Fed. R. Evid.  
14 104(a)). The Court reiterated that it would consider only “publicly reported information that  
15 possesses substantial indicia of reliability.” *Id.* at 990. *Accord Terkel*, 441 F. Supp. 2d at 913  
16 (“the focus should be on information that bears persuasive indication of reliability”). Applying  
17 this standard, the Court declined to “rely on media reports about the alleged NSA programs  
18 because their reliability is unclear,” in light of conflicting reports regarding the involvement of  
19 Verizon and BellSouth in the records program. *Hepting*, 439 F. Supp. 2d at 991. The Court also  
20 declined to consider the Klein declaration in making its determination because “the inferences  
21 Klein draws have been disputed,” and expressed concern that considering it “would invite  
22 attempts to undermine the privilege by mere assertions of knowledge by an interested party.” *Id.*

23

---

24 <sup>61</sup> In *Terkel*, the Court expressed concern that if “section 6 is taken to its logical conclusion,  
25 it would allow the federal government to conceal information regarding blatantly illegal or  
26 unconstitutional activities simply by assigning these activities to the NSA or claiming they  
27 implicated information about the NSA’s functions,” and was “hard-pressed to read section 6 as  
28 essentially trumping every other Congressional enactment and Constitutional provision.” 441 F. Supp. 2d at 905. Plaintiffs concur wholeheartedly with this wise judicial pronouncement. With respect to § 403-1(i)(1), the Court observed that “the plaintiffs have sued only AT&T and are seeking discovery only from that entity, not the Director of National Intelligence, the NSA, or any governmental agency. Under these circumstances, section [403-1(i)(1)] does not by itself bar prosecution of this case.” *Id.* at 906.

1 at 990.<sup>62</sup>

2 Having eliminated the only other proffered sources of information, in making its  
3 determination, the Court considered “only public admissions or denials by the government,  
4 AT&T and other telecommunications companies, which are the parties indisputably situated to  
5 disclose whether and to what extent the alleged programs exist.” *Id.*

6 Considering this limited set of information, the Court concluded that:

7 despite many public reports on the matter, the government has  
8 neither confirmed nor denied whether it monitors communication  
9 records and has never publicly disclosed whether the NSA program  
10 reported by *USA Today* on May 11, 2006, actually exists.

11 Although BellSouth, Verizon and Qwest have denied participating  
12 in this program, AT&T has neither confirmed nor denied its  
13 involvement. Hence, unlike the program monitoring  
14 communication content, the general contours and even the existence  
15 of the alleged communication records program remain unclear.

16 *Id.* at 997. However, the Court stressed that:

17 While this case has been pending, the government and  
18 telecommunications companies have made substantial public  
19 disclosures on the alleged NSA programs. It is conceivable that  
20 these entities might disclose, either deliberately or accidentally,  
21 other pertinent information about the communication records  
22 program as this litigation proceeds. The court recognizes such  
23 disclosures might make this program’s existence or non-existence  
24 no longer a secret. Accordingly, while the court presently declines  
25 to permit any discovery regarding the alleged communication  
26 records program, if appropriate, plaintiffs can request that the court  
revisit this issue in the future.

27 *Id.* at 997-98. The additional disclosures highlighted below fully warrant such revisit.

28 **B. The Existence of The Records Program Has Been Acknowledged by Nineteen**  
**Members of Congress Briefed on the Program by the NSA**

29 While the May 11, 2006 *USA Today* story reporting the existence of the records  
30 program may have contained inaccuracies regarding the participants in the program, rendering its  
31 “reliability unclear,” those inaccuracies have been corrected. As a result of the discussions,  
32 briefings, and disclosures generated by that article, what emerges is a coherent and consistent  
33 story bearing “substantial indicia of reliability.” These disclosures leave no *reasonable* doubt that

---

34 <sup>62</sup> Plaintiffs do not concede that Mr. Klein is an “interested party,” or that the inferences drawn by  
35 the *Hepting* plaintiffs can reasonably be disputed, but as the Klein declaration is not directly at  
36 issue with respect to Defendants other than AT&T, Plaintiffs need not take issue with either point  
37 here.

1 the records program exists, and that at a minimum, AT&T and Verizon's recently-acquired  
2 subsidiary, MCI, gave the NSA access to customer call records.

3                 Within days following publication of the May 11 story, which reported that Qwest  
4 Communications had refused to participate in the program, the former CEO of Qwest — a person  
5 “indisputably situated to disclose whether and to what extent the alleged programs exist” —  
6 issued a statement publicly confirming that he was repeatedly requested “to permit the  
7 Government access to the private telephone records of Qwest customers” without “a warrant or  
8 other legal process,” but refused to comply because he “concluded that these requests violated the  
9 privacy requirements of the Telecommunications [sic] Act.” Himmelstein Decl., Exh. N.

10                 Within a week following publication of the May 11 story, the Chairman of the  
11 Senate Select Committee on Intelligence, another of its members, and the Senate Majority Leader  
12 were interviewed concerning the story on NPR, PBS, and CNN, respectively, confirmed that they  
13 had been extensively briefed on the records program, establishing their knowledge; and  
14 confirmed its existence, although they declined to discuss its details. The Director of National  
15 Intelligence confirmed publicly and in writing that each of these Senators had been briefed  
16 repeatedly on the NSA’s Terrorist Surveillance Program, and that such briefings had taken place  
17 at the White House, at the Capitol, and at the itself NSA, as Senator Roberts had described. *See*  
18 Part III.B., *supra*. *Compare Terkel*, 441 F. Supp. 2d at 914 (complaining that there was no way  
19 for the Court to determine whether the cited media reports were ‘based on information from  
20 persons who would have reliable knowledge about the existence or non-existence of the activity  
21 alleged’).

22                 Significantly, the public statements of Senators Bond and Roberts were not before  
23 the Courts in *Hepting* or *Terkel*. The fact that these Senators oversaw the program from The  
24 Capitol rather than The White House makes them no less statements by informed and credible  
25 government officials possessing “substantial indicia of reliability.” *See Jabara v. Kelley*, 75  
26 F.R.D. 475, 493 (E.D. Mich. 1977) (in view of report of Senate Select Committee on Intelligence  
27 disclosing name of federal agency “that has admittedly intercepted plaintiff’s personal  
28 communications without prior court approval,” it “would be a farce to conclude that the name of

1 this other federal agency remains a military or state secret"). Considered in conjunction with  
2 additional published reports confirming the existence of the records program, the public status of  
3 the program can no longer reasonably be disputed.

4 Beginning on May 17, 2006, the Director of the NSA, Lt. General Keith B.  
5 Alexander, briefed the full membership of the Intelligence Committees on the "full" scope of  
6 NSA surveillance activities. Himmelstein Decl., Exh. Z, at 1-2, 8. Following these briefings, on  
7 June 30, 2006, with its journalistic integrity under attack by Verizon and BellSouth, who had  
8 denied participation in the records program, *USA Today* "set the record straight" in an article  
9 entitled "Lawmakers: NSA database incomplete" (the "June 30 article").<sup>63</sup> In a sidebar, "A Note  
10 To Our Readers," the paper acknowledged the controversy, explaining that:

11 USA TODAY continued to pursue details of the database, speaking  
12 with dozens of sources in the telecommunications, intelligence and  
13 legislative communities, including interviews with members of  
Congress who have been briefed by senior intelligence officials on  
the domestic calls program.

14 In the adjoining article, USA TODAY reports that five members of  
15 the congressional intelligence committees said they had been told in  
secret briefings that BellSouth did not turn over call records to the  
16 NSA, three lawmakers said they had been told that Verizon had not  
participated in the NSA database, and four said that Verizon's  
17 subsidiary MCI did turn over records to the NSA.

18 Himmelstein Decl., Exh. V at 1-2. The article also reported that nineteen members of the Senate  
19 and House Intelligence Committees who had been briefed on the records program confirmed its  
existence:

20 Members of the House and Senate intelligence committees confirm  
21 that the National Security Agency has compiled a massive database  
22 of domestic phone call records. But some lawmakers also say that  
cooperation by the nation's telecommunication companies was not  
23 as extensive as first reported by USA TODAY on May 11.

24 Several lawmakers, briefed in secret by intelligence officials about  
the program after the story was published, described a call records

25  
26 <sup>63</sup> The *Hepting* plaintiffs filed their opposition to the government's motion to dismiss on June 8,  
2006 (see *Hepting* Dkt. No. 181), three weeks before publication of the June 30 article, and the  
27 motion was argued on June 23, 2006, one week before publication of the article. While the  
*Hepting* plaintiffs moved to supplement the record with the article (Dkt. No. 299), that motion  
28 was never ruled upon, and the sole reference to the article in *Hepting* is the statement that  
"BellSouth and Verizon's denials have been at least somewhat substantiated in later reports." 439  
F. Supp. 2d at 989.

1 database that is enormous but incomplete. Most asked that they not  
2 be identified by name, and many offered only limited responses to  
3 questions, citing national security concerns.

4 In the May 11 article that revealed the database, USA TODAY  
5 reported that its sources said AT&T, BellSouth and Verizon had  
6 agreed to provide the NSA with call records.

7 AT&T, which is the nation's largest telecommunications company,  
8 providing service to tens of millions of Americans, hasn't  
9 confirmed or denied its participation with the database. BellSouth  
10 and Verizon have denied that they contracted with the NSA to turn  
11 over phone records. On May 12, an attorney for former Qwest  
12 CEO Joseph Nacchio confirmed the USA TODAY report that  
13 Qwest had declined to participate in the NSA program.

14 Most members of the intelligence committees wouldn't discuss  
15 which companies cooperated with the NSA. However, several did  
16 offer more information about the program's breadth and scope,  
17 confirming some elements of USA TODAY's report and  
18 contradicting others:

- 19 • *Nineteen lawmakers who had been briefed on the program  
20 verified that the NSA has built a database that includes records of  
21 Americans' domestic phone calls. The program collected records  
22 of the numbers dialed and the length of calls, sources have said, but  
23 did not involve listening to the calls or recording their content.*
- 24 • *Five members of the intelligence committees said they were told  
25 by senior intelligence officials that AT&T participated in the NSA  
26 domestic calls program.*

27 \* \* \*

- 28 • *Five members of the intelligence committees said they were told  
29 that BellSouth did not turn over domestic call records to the NSA.*

30 \* \* \*

- 31 • *Three lawmakers said that they had been told that Verizon did not  
32 turn over call records to the NSA. However, those three and  
33 another lawmaker said MCI, the long-distance carrier that Verizon  
34 acquired in January, did provide call records to the government.*

35 Himmelstein Decl., Exh. V at 1-2 (emphasis added). Plaintiffs respectfully submit that  
36 confirmation by nineteen members of Congress briefed on the program by the NSA, reported by a  
37 reputable national newspaper that had an unusually strong interest in ensuring the accuracy of its  
38 reporting, bears "substantial indicia of reliability," even if the members are not identified by  
39 name, especially when considered in conjunction with "on-the-record" confirmations by three  
40 members of the Senate Intelligence Committee. The Nacchio statement buttresses this conclusion

1 even further.

2           In *Hepting*, the Court declined to “estimate the risk tolerances of terrorists in  
3 making their communications and hence eschew[ed] the attempt to weigh the value of the  
4 information.” 439 F. Supp. 2d at 990. Plaintiffs respectfully submit that in determining whether  
5 the existence of the records program, and the identity of the participating carriers, remains a  
6 “secret” for purposes of the state secrets privilege, the Court must assume that potential terrorists  
7 possess at least a modicum of common sense. Common sense requires potential terrorists to  
8 assume that the records program exists, and that AT&T and MCI have provided their customers’  
9 call detail records to the NSA. Accordingly, the program, and the participation of these carriers,  
10 is no longer a “secret,” and Plaintiffs should be permitted discovery on their records claims.<sup>64</sup>

11           **C. Verizon Has Tacitly Admitted That MCI Participated in the Records**  
12           **Program**

13           Verizon’s purported “denials,” like BellSouth’s, are fully consistent with the June  
14 30 article. Verizon’s carefully worded, May 16, 2006 “denial” bears repeating:

15           From the time of the 9/11 attacks *until just four months ago*,  
16 *Verizon had three major businesses*-its wireline phone business, its  
17 wireless company and its directory publishing business. It also had  
18 its own Internet Service Provider and long-distance businesses.  
19 Contrary to the media reports, Verizon was not asked by NSA to  
20 provide, nor did Verizon provide, customer phone records from any  
21 of *these businesses*, or any call data from *those records*. None of  
22 *these companies*-wireless or wireline-provided customer records or  
23 call data.<sup>65</sup>

24           On May 16, 2006, *USA Today* reported that:

25           Verizon’s [May 16, 2006] statement does not mention MCI, the  
26 long-distance carrier the company bought in January. Before the  
27 sale, Verizon sold long-distance under its own brand. *Asked to*  
28 *elaborate on what role MCI had, or is having, in the NSA program,*  
29 *spokesman Peter Thonis said the statement was about Verizon, not*  
30 *MCI.*

31 MCI/Verizon Master Compl., ¶ 162; Himmelstein Decl., Exh. S at 2 (emphasis added). Taken  
32 together, these two statements — vehemently denying Verizon’s own participation in the  
33

---

34           <sup>64</sup> If the Court agrees that the additional information justifies discovery concerning the records  
35 claims against the other carriers, discovery concerning those claims against AT&T should be  
36 permitted as well.

37           <sup>65</sup> *Id.* at 988-89 (emphasis added).

1 program, but *refusing* to deny the participation of its newly-acquired subsidiary, MCI — amount  
2 to a tacit admission that MCI did in fact participate in the program. *Cf. Hepting*, 439 F. Supp. 2d  
3 at 997-98 (“It is conceivable that [the telecommunications companies] might disclose, *either*  
4 *deliberately or accidentally*, other pertinent information about the communication records  
5 program” that might make the program’s “existence or non-existence no longer a secret”)  
6 (emphasis added). This inescapable conclusion is reinforced by another press release issued by  
7 Verizon the day after the May 11 story was published, entitled “Verizon Issues Statement on  
8 NSA and Privacy Protection”:

Verizon will provide customer information to a government agency only where authorized by law for appropriately-defined and focused purposes. . . . Verizon does not, and will not, provide any government agency unfettered access to our customer records or provide information to the government under circumstances that would allow a fishing expedition.

In January 2006, Verizon acquired MCI, and we are ensuring that Verizon's policies are implemented at that entity and that all its activities fully comply with law.

15 MCI/Verizon Master Compl., ¶ 160; Himmelstein Decl., Exh. M (emphasis added). Read in  
16 conjunction with Verizon’s May 16 statements, the clear implication of this dichotomous  
17 statement is that while *Verizon* did not provide the government with access to its customers’  
18 records, the same could not be said for MCI.

**D. Discovery Concerning the Existence of Any Certifications Concerning the Records Program Received by Verizon and/or BellSouth Must Be Permitted**

The fact that Verizon and BellSouth have issued denials concerning the call records program is significant for another reason. In *Hepting*, the Court noted that “[i]mportantly, the public denials by these telecommunications companies undercut the government and AT&T’s contention that revealing AT&T’s involvement or lack thereof in the [records] program would disclose a state secret.” *Hepting*, 439 F. Supp.2d at 997. The Court’s observation is even more apt here. Given that Verizon and BellSouth have voluntarily issued public denials via press release, it would be anomalous to hold that Plaintiffs are precluded from requiring these defendants to respond under oath to carefully tailored requests for admissions and interrogatories

1 concerning the accuracy of their statements. As the Court held with respect to the government's  
2 admissions concerning the content program:

3 Based on these public disclosures, the court cannot conclude that  
4 the existence of a certification regarding the "communication  
5 content" program is a state secret. If the government's public  
6 disclosures have been truthful, revealing whether AT&T has  
7 received a certification to assist in monitoring communication  
8 content should not reveal any new information that would assist a  
9 terrorist and adversely affect national security. And if the  
10 government has not been truthful, the state secrets privilege should  
11 not serve as a shield for its false public statements. In short, the  
12 government has opened the door for judicial inquiry by publicly  
13 confirming and denying material information about its monitoring  
14 of communication content.

15 *Id.* at 996. Consistent with this holding, discovery concerning the existence of any certifications  
16 concerning the records program received by Verizon and/or BellSouth must be permitted.

17 **E. The Wholesale Violation of Federal Privacy Laws Cannot Be a "State Secret"**

18 Finally, Plaintiffs join in the *Hepting* plaintiffs' argument that "Congress, through  
19 various statutes, has limited the state secrets privilege in the context of electronic surveillance and  
20 has abrogated the privilege regarding the existence of a government certification." 439 F. Supp.  
21 2d at 998. Congress has enacted, and the President has signed into law, numerous statutes whose  
22 sole purpose is to *prevent* the government from intruding on the privacy of its citizens. Plaintiffs  
23 respectfully submit that the wholesale violation of these laws cannot be allowed to continue  
24 merely because the violations have occurred in secret. If it is a secret, it is not a secret that the  
25 law countenances be *kept*; it is a secret that must *come out*, or the rights conferred by these  
26 statutes — and the Fourth Amendment — become meaningless.

27 In *Hepting*, the Court "decline[d] to address these issues presently, particularly  
28 because the issues might very well be obviated by future public disclosures by the government  
and AT&T," but stated that "[i]f necessary, the court may revisit these arguments at a later stage  
of this litigation." *Id.* at 998. Plaintiffs respectfully submit that if confirmation of the existence  
of the program by 19 informed members of Congress is not sufficient to obviate these issues, it is  
time for the Court to address them.

1       **VI. THE COURT'S RULINGS ON AT&T'S MOTION TO DISMISS ARE EQUALLY**  
2       **APPLICABLE HERE**

3       **A. Plaintiffs Have Standing to Pursue Their Claims**

4           In *Hepting*, AT&T argued that plaintiffs had “not sufficiently alleged injury-in-  
5       fact” to establish standing under the “case or controversy” requirement of Article III of the U.S.  
6       Constitution, and that plaintiffs lacked standing to pursue their federal statutory claims “because  
7       the FAC alleges no *facts* suggesting that their statutory rights have been violated’ and ‘the FAC  
8       alleges nothing to suggest that the *named plaintiffs* were themselves subject to surveillance.”” *Id.*  
9       at 1000 (emphasis in original). The Court rejected these arguments, and held that plaintiffs had  
10      established both Article III standing and standing to pursue their federal statutory claims, on  
11      grounds equally applicable here:

12           AT&T ignores that the gravamen of plaintiffs’ complaint is that  
13       AT&T has created a dragnet that collects the content and records of  
14       its customers’ communications. The court cannot see how any one  
15       plaintiff will have failed to demonstrate injury-in-fact if that  
16       plaintiff effectively demonstrates that all class members have so  
17       suffered. . . . As long as the named plaintiffs were, as they allege,  
18       AT&T customers during the relevant time period, the alleged  
19       dragnet would have imparted a concrete injury on each of them. [¶]  
20       This conclusion is not altered simply because the alleged injury is  
21       widely shared among AT&T customers.

22           *Id.* at 1000. The only other court to examine the standing issue reached the same conclusion. *See*  
23       *Terkel*, 441 F. Supp. 2d at 904 (allegations based on media reports “that the government intends  
24       to collect and analyze all domestic telephone records, that AT&T has already released large  
25       quantities of records, and that federal intelligence gathering agencies have focused on their efforts  
26       on large metropolitan areas like Chicago . . . sufficiently alleged that [plaintiffs] are suffering a  
27       particularized injury for which they can seek relief,” and claimed “ongoing violation of  
28       [plaintiffs’] statutory rights under section 2702(a)(3) . . . in itself is sufficient to establish  
standing”).

29           In *Hepting*, AT&T further argued “that the state secrets privilege bars plaintiffs  
30       from establishing standing.” 439 F. Supp. 2d at 1001. The Court rejected this argument as well,  
31       on grounds equally applicable here:

32           [A]s described above, the state secrets privilege will not prevent

1 plaintiffs from receiving at least some evidence tending to establish  
2 the factual predicate for the injury-in-fact underlying their claims  
3 directed at AT&T's alleged involvement in the monitoring of  
4 communication content. And the court recognizes that additional  
5 facts might very well be revealed during, but not as a direct  
consequence of, this litigation that obviate many of the secrecy  
concerns currently at issue regarding the alleged communication  
records program. Hence, it is unclear whether the privilege would  
necessarily block AT&T from revealing information about its  
participation, if any, in that alleged program.

6 *Id.* at 1001 (internal citations omitted).

7 **B. Plaintiffs Have Alleged the Absence of a Certification**

8 In *Hepting*, AT&T argued that “telecommunications providers are immune from  
9 suit if they receive a government certification [under 18 U.S.C. § 2511(2)(a)(ii) or 18 U.S.C. §  
10 2703(e)] authorizing them to conduct electronic surveillance,” and “that plaintiffs have the burden  
11 to plead affirmatively that AT&T lacks such a certification and that plaintiffs have failed to do so  
here, thereby making dismissal appropriate.” *Id.* at 1001 (citation omitted). The Court rejected  
13 this argument, finding that:

14 [T]he court need not decide whether plaintiffs must plead  
15 affirmatively the absence of a certification because the present  
complaint, liberally construed, alleges that AT&T acted outside the  
16 scope of any government certification it might have received.

17 \* \* \*

18 Plaintiffs contend that the phrase “occurred without judicial or other  
19 lawful authorization” means that AT&T acted without a warrant or  
a certification. . . . [¶] . . . [P]aragraph 81 could be reasonably  
20 interpreted as alleging just that.

21 \* \* \*

22 In sum, even if plaintiffs were required to plead affirmatively that  
AT&T did not receive a certification authorizing its alleged actions,  
23 plaintiffs’ complaint can fairly be interpreted as alleging just that.

24 *Id.* at 1002-03.<sup>66</sup>

25 As set forth above, in *Hepting*, the dispute focused on whether or not plaintiffs

26 \_\_\_\_\_  
27 <sup>66</sup> Plaintiffs respectfully disagree with the Court’s suggestion that “a lack of certification is an  
element of a Title III claim” under 18 U.S.C. § 2520 (*id.* at 1002), as opposed to an affirmative  
28 defense, and incorporate by reference the *Hepting* plaintiffs’ briefing and argument on this issue  
as if fully set forth herein. However, as it is equally unnecessary to resolve this issue here,  
Plaintiffs will not burden the Court with such unnecessary and/or duplicative briefing.

1 had *implicitly* alleged that AT&T had not received a certification under either 18 U.S.C. §  
2 2511(2)(a)(ii) or 18 U.S.C. § 2703(e). Here, Plaintiffs have *expressly* alleged the absence of any  
3 such certification.<sup>67</sup> Because the *Hepting* plaintiffs' *implicit* allegation was sufficient to pass  
4 muster, *a fortiori*, Plaintiffs' *explicit* allegations that Defendants did not receive certifications also  
5 suffice.

6 **C. Defendants Have No Common Law Immunity**

7 In *Hepting*, AT&T argued that "the complaint should be dismissed because it  
8 failed to plead the absence of an absolute common law immunity to which AT&T claims to be  
9 entitled." *Id.* at 1003. The Court rejected this argument as well, concluding that:

10 [E]ven if a common law immunity existed decades ago, applying it  
11 presently would undermine the carefully crafted scheme of claims  
12 and defenses that Congress established in subsequently enacted  
13 statutes. For example, all of the cases cited by AT&T as applying  
14 the common law "immunity" were filed before the certification  
15 provision of FISA went into effect. That provision protects a  
16 telecommunications provider from suit if it obtains from the  
17 Attorney General or other authorized government official a written  
18 certification "that no warrant or court order is required by law, that  
19 all statutory requirements have been met, and that the specified  
20 assistance is required." 18 U.S.C. § 2511(2)(a)(ii)(B). Because the  
21 common law "immunity" appears to overlap considerably with the  
22 protections afforded under the certification provision, the court  
23 would in essence be nullifying the procedural requirements of that  
24 statutory provision by applying the common law "immunity" here.  
25 And given the shallow doctrinal roots of immunity for  
communications carriers at the time Congress enacted the statutes  
in play here, there is simply no reason to presume that a common  
law immunity is available simply because Congress has not  
expressed a contrary intent.

26 *Id.* at 1005-06 (citations omitted).

27 The Court's holding that recognizing a common law immunity for  
28 telecommunications carriers "would undermine the carefully crafted scheme of claims and  
defenses that Congress established in subsequently enacted statutes" is a pure conclusion of law,  
and is therefore equally applicable here.

---

26 <sup>67</sup> See MCI/Verizon Master Compl., ¶ 209 ("Defendant has not been provided with a certification  
27 in writing by a person specified in 18 U.S.C. § 2518(7) or by the Attorney General of the United  
28 States meeting the requirements of 18 U.S.C. § 2511(2)(a)(ii)(B), *i.e.*, a certification that no  
warrant or court order authorizing the disclosures is required by law, and that all statutory  
requirements have been met."); Bellsouth Master Compl., ¶ 109 (same); Sprint Master Compl., ¶  
81 (same); Transworld Master Compl., ¶ 96 (same); Cingular Master Compl., ¶ 97 (same).

1                   **D.     Defendants Have No Qualified Immunity**

2                   In *Hepting*, AT&T argued that “it is entitled to qualified immunity.” *Id.* at 1006.

3                   After reviewing at length the history and purposes of the qualified immunity doctrine, the Court  
4                   concluded that:

5                   AT&T’s concerns, while relevant, do not warrant extending  
6                   qualified immunity here because the purposes of that immunity are  
7                   already well served by the certification provision of 18 U.S.C. §  
8                   2511(2)(a)(ii).

9                   More fundamentally, “[w]hen Congress itself provides for a defense  
10                   to its own cause of action, it is hardly open to the federal court to  
11                   graft common law defenses on top of those Congress creates.”  
12                   *Berry v. Funk*, 146 F.3d 1003, 1013 (D.C. Cir. 1998) (holding that  
13                   qualified immunity could not be asserted against a claim under Title  
14                   III). . . .

15                   [T]he statutes in this case set forth comprehensive, free-standing  
16                   liability schemes, complete with statutory defenses, many of which  
17                   specifically contemplate liability on the part of telecommunications  
18                   providers such as AT&T. . . . It can hardly be said that Congress  
19                   did not contemplate that carriers might be liable for cooperating  
20                   with the government when such cooperation did not conform to the  
21                   requirements of the act.

22                   In sum, neither the history of judicially created immunities for  
23                   telecommunications carriers nor the purposes of qualified immunity  
24                   justify allowing AT&T to claim the benefit of the doctrine in this  
25                   case.

26                   *Id.* at 1008-09. The Court’s reasoning, as well as its conclusion, is equally applicable here, as it  
27                   depends not on allegations unique to AT&T, but on an analysis of statutory framework.

28                   The Court further held that:

29                   AT&T is not entitled to qualified immunity with respect to  
30                   plaintiffs’ constitutional claim, at least not at this stage of the  
31                   proceedings. Plaintiffs’ constitutional claim alleges that AT&T  
32                   provides the government with direct and indiscriminate access to  
33                   the domestic communications of AT&T customers. . . .  
34                   Accordingly, AT&T’s alleged actions here violate the constitutional  
35                   rights clearly established in *Keith*.<sup>68</sup> Moreover, because “the very  
36                   action in question has previously been held unlawful,” AT&T  
37                   cannot seriously contend that a reasonable entity in its position  
38                   could have believed that the alleged domestic dragnet was legal.  
39                   [¶] Accordingly, the court DENIES AT&T’s instant motion to  
40                   dismiss on the basis of qualified immunity.

41                   *Id.* at 1009-10 (quoting *Hope v. Pelzer*, 536 U.S. 730, 739 (2002)).

---

42                   <sup>68</sup> *United States v. United States District Court*, 407 U.S. 297 (1972).

1                   As in *Hepting*, Plaintiffs have alleged that Defendants have provided the federal  
2 government with “indiscriminate access to the domestic communications” of their customers, as  
3 well as records pertaining to those communications. Accordingly, as in *Hepting*, Defendants are  
4 not entitled to qualified immunity on Plaintiffs’ constitutional claim.

5                   **VII. CONCLUSION**

6                   For the foregoing reasons, the Court’s rulings in *Hepting* should apply to the cases  
7 brought against the other Defendants, except the Court should find that the existence of the  
8 records program, and AT&T’s and MCI’s participation in the program, is no longer a secret, and  
9 permit discovery on Plaintiffs’ records claims.

10                  Dated: February 1, 2007
